

## ***Micro-Tenex***<sup>®</sup> **Pultruded rod sensors**

The strength and flexibility of ***Micro-Tenex***<sup>®</sup> makes it an ideal basis for a wide range of custom sensors for harsh environments such as embedment in concrete and sub-sea deployment. Continuous arrays of many strain sensors plus a temperature sensor can be embedded in all of the pultruded rod profiles. More than one fibre can be embedded in the larger profile rods.

### **Standard sizes are:**

- 2mm diameter
- 3mm diameter
- 5mm X 2mm rectangular
